QUESTION 1

You have a Microsoft 365 subscription.

You use app protection policies to protect corporate data on Android devices.

You need to ensure that any user connecting from an Android device can only access the corporate data if they connect from an app that supports mobile application management (MAM).

What should you configure?

- A. an app configuration policy
- B. a Conditional Access policy
- C. a device configuration profile
- D. a device compliance policy

Correct Answer: B

Mobile Application Management (MAM)

Common Conditional Access policy: Require approved client apps or app protection policy

In Conditional Access policy, you can require that an Intune app protection policy is present on the client app before access is available to the selected applications. These mobile application management (MAM) app protection policies allow

you to manage and protect your organization's data within specific applications.

To apply this grant control, Conditional Access requires that the device is registered in Microsoft Entra ID, which requires using a broker app. The broker app can be either Microsoft Authenticator for iOS or Microsoft Company Portal for

Android devices. If a broker app isn't installed on the device when the user attempts to authenticate, the user is redirected to the app store to install the broker app. App protection policies are generally available for iOS and Android, and in

public preview for Microsoft Edge on Windows

QUESTION 2

Your network contains an Active Directory Domain Services (AD DS) domain. The domain contains 100 client computers that run Windows 10.

Currently, your company does NOT have a deployment infrastructure.

The company purchases Windows 11 licenses through a volume licensing agreement.

You need to recommend how to upgrade the computers to Windows 11. The solution must minimize licensing costs.

What should you include in the recommendation?

- A. Windows Autopilot
- B. Configuration Manager
- C. subscription activation
- D. Microsoft Deployment Toolkit (MDT)

Correct Answer: D

Subscription activation doesn't update a device from Windows 10 to Windows 11. Only the edition is updated.

QUESTION 3

You have a Microsoft Intune subscription.

You have devices enrolled in Intune as shown in the following table.

Name	Operating system
Device1	Android 8.1.0
Device2	Android 9
Device3	iOS 11.4.1
Device4	iOS 12.3.1
Device5	iOS 12.3.2

An app named App1 is installed on each device.

What is the minimum number of app configuration policies required to manage App1?

- A. 1
- B. 2
- C. 3
- D. 4
- E. 5

Correct Answer: B

One for Android, and one for iOS.

QUESTION 4

You need to configure Delivery Optimization to meet the technical requirements. Which download mode should you use?

- A. Simple (99)
- B. Group (2)
- C. Internet (3)
- D. HTTP Only (0)
- E. Bypass (100)

Correct Answer: D

Reference: <https://docs.microsoft.com/en-us/windows/deployment/update/waas-delivery-optimizationreference#download-mode>

QUESTION 5

You need to meet the technical requirement for the IT department users. What should you do first?

- A. Issue computer certificates.
- B. Distribute USB keys to the IT department users.
- C. Enable screen saver and configure a timeout.
- D. Turn on Bluetooth.

Correct Answer: D
