## QUESTION 1

A FortiADC administrator wants to offload SSL encryption and decryption of web traffic to lessen overhead on the real servers, while maintaining SSL encryption with the client.

Which must be true to allow FortiADC to provide this capability?

- A. The real server pool must be configured for SSL
- B. The virtual server must be configured to perform content routing
- C. The real server certificate and private key must be installed on FortiADC
- D. The virtual server must use a TCPS application profile

Correct Answer: C

---

## QUESTION 2

Which two FortiADC features can you use to harden the device and server security? (Choose two.)

- A. Connection limits
- B. Web filtering
- C. Antivirus scanning
- D. FortiGuard IP reputation

Correct Answer: AD

---

## QUESTION 3

An administrator has been assigned the task of protecting their company application delivery servers from OWASP top-10 threats.

How must they configure FortiADC to provide this capability?

- A. Configure advanced health checks
- B. Configure Layer 7 custom rates
- C. Configure the advanced WAF
- D. Configure IPv4 firewall policies

Correct Answer: C

---

## QUESTION 4

Which two configuration actions are possible when protecting application delivery servers from clients with IP addresses in the IP reputation database? (Choose two.)

- A. Automatically create a WAF profile based on the traffic
- B. Redirect the traffic to a different URL
- C. Block the traffic.
- D. Analyze the traffic using WVS rules

Correct Answer: BC

---

## QUESTION 5

When using FortiADC in a global load balancing configuration, in which two ways do general DNS settings differ from a global DNS policy? (Choose two.)

- A. Traffic not matching a global DNS policy is served by the general DNS settings
- B. Traffic matching source or destination criteria is served by the general DNS policy.
- C. Traffic matching the zone, as well as both source and destination criteria, is served by the global DNS policy.
- D. Traffic not matching general DNS settings is served by a matching global DNS policy.

Correct Answer: AC
