QUESTION 1

Is this the authentication method or flow that is used when an end user launches a SAML application from the Okta end user home dashboard?

Solution: Identity Provider (Idp) initiated

A. Yes

B. No

Correct Answer: B

QUESTION 2

Does this Okta agent support provisioning? Solution: Active Directory Agent

A. Yes

B. No

Correct Answer: A

Explanation: https://support.okta.com/help/s/article/Provisioning-Concepts-and- Methods? language=en_US

Agent-based Provisioning An agent (windows service, linux daemon) installed to the local environment brokers Provisioning transaction requests between Okta and the on-premise resource. Currently Supported Provisioning agents This is a good, robust strategy. However, it is limited to on-premise applications.

QUESTION 3

Is this one of the default base attributes in the Okta user profile that can be marked as required or optional for Okta mastered users?

Solution: firstName

A. Yes

B. No

Correct Answer: B

Explanation: Okta has defined 31 default base attributes for all users in an org. These base attributes are generally fixed and cannot be modified or removed. There are two exceptions: First Name and Last Name. These two attributes can be marked as required or optional for Okta and Active Directory (AD)-mastered users. The default setting for new AD instances is that first and last name are required. https:// help.okta.com/en/prod/Content/Topics/Directory/ad-name-optional.htm
