QUESTION 1

Based on security factors, which two options are considered strong passwords? (Choose Two)

- A. 1Lk3ChocolateandStrawberryIcecre@m
- B. Pe6@5yst3m\$
- C. d8073andgxn*,.ki;vnhdf(\$h8un
- D. bluedoor

Correct Answer: BC

QUESTION 2

A car insurance quote requires a view for potential customers to enter information to process the request. What are the three primary decisions to make before you add fields to the view? (Choose Three)

- A. Is field entry required?
- B. How do users enter values into the field?
- C. Do users need to see the field?
- D. Does the field require a data source?
- E. Are processing actions applied to the field?

Correct Answer: CDE

QUESTION 3

A requirement states: When a customer applies for a credit card, a credit check must be completed in order for the credit card to be approved. Select the case type relationship that satisfies the requirement.

- A. Make credit card request a child case of credit check.
- B. Make credit check a spin-off case of credit card request.
- C. Make credit check a child case of credit card request.
- D. Make both loan request and credit check top cases.

Correct Answer: B

QUESTION 4

In a Human Resources (HR) application, a business architect has developed a new process for the Onboarding case type. You want to test the process and the fields to verify the UI elements collect expected results. When applied in combination, which two configurations allow you to record a set of interactions and save the test results to verify the process functionality? (Choose Two)

- A. Add explicit assertions on the UI elements
- B. Create a unit test for the Onboarding case type
- C. Create a scenario test for the Onboarding case type
- D. Add validations on the UI elements

Correct Answer: AD

QUESTION 5

Customers on a hotel booking application can add additional amenities to their reservation. The application displays a view with the available amenities, descriptions and costs. To reduce scrolling, the content is organized into multiple areas. Each area is accessed using a drop down menu that lists each amenity.

How do you configure the user interface to improve access to the content and achieve the business requirement described?

- A. Configure a disable when condition on each field to allow access when the associated amenity is selected on the drop down control.
- B. Configure a repeating dynamic layout with an embedded section for each amenity and set the layout
- C. format to grouped.
- D. Configure a layout group to separate each amenity into individual panels and set the layout to a menu format.
- E. Configure a visible when condition on the drop down control to display each section when the associated amenity is selected.

Correct Answer: A
