QUESTION 1

From the employee training portal, an employee opens a new Enrollment case, submits course selections, and receives an email confirmation. There is an error in the email confirmation. You must identify the cause of the error by recording a set of interactions on the portal and testing expected behavior on the data collection fields.

What three steps, when applied in combination, achieve the required testing? (Choose Three)

- A. Add stage-entry validations on the Enrollment case fields.
- B. Create a test case for the employee portal.
- C. Add assertions on the UI elements to verify correct data collection.
- D. Run a new Enrollment case from the employee training portal.
- E. Add field validations on the course selection step.

Correct Answer: ACD

QUESTION 2

An international online car parts business wants customers to find parts for any vehicle easily. You are asked to implement the following requirement: Customers must select a make, model, and year to initiate a vehicle-specific search. How do you configure the data storage in the application to implement the requirement?

- A. Configure a data page to store the make, model, and year vehicle data.
- B. Configure a connection to an external system of record that contains the make, model, and year vehicle data.
- C. Configure a static list of the make, model, and year vehicle data.
- D. Configure a local data storage of the make, model, and year vehicle data.

Correct Answer: B

QUESTION 3

A developer is attempting to reference a validate rule called ValidateCustomer from a flow action applied to a case type class called ACME-IT-Work-Ticket. The case type class directly inherits from the Work- class. The case type class does not contain a ValidateCustomer validate rule.

Place the classes in the order in which Pega searches for the ValidateCustomer validate rule.

Select and Place:

Class Name

ACME-IT-Work
ACME-IT
ACME
Work-
@baseclass

Search Order

>	^
<	v

Correct Answer:

Class Name

Search Order

>	^
<	v

ACME
ACME-IT
Work-
@baseclass
ACME-IT-Work

QUESTION 4

A government application provides field placeholder values to help users enter the correct data. The Design Lead has asked you to increase the font size on all field placeholder value components to help visually impaired users. Which configuration applies the font styling requirement on the field placeholder values in the application?

- A. Update the existing Default theme text entry
- B. Run a case type that uses the component and change the font on the view
- C. Add a new theme text entry to the application theme
- D. Upload a new application theme

Correct Answer: D

QUESTION 5

When applying for a credit limit increase, customers with standard credit cards must provide information in an Employment Information process. Requests from customers with Platinum credit cards automatically skip this process. What task do you perform to implement this requirement?

- A. In the Employment Information process add a card type true/false field to a user view.

- B. In the Employment Information process add a custom condition to start the process by testing the card type.
- C. In the Employment Information process add an Approve/Reject step to test the card type.
- D. In the Employment Information process validate card type for continued processing.

Correct Answer: A
