QUESTION 1

Which deployment tool will you use to deploy metadata from one organization to another organization?

A. Force.com Migration Tool

B. Unmanaged Packages

C. Force.com IDE

D. Change sets

Correct Answer: A

QUESTION 2

Cloud Kicks (CK) wants to set up a custom child object to track gift cards issued to a customer. A key requirement is to track the total number of gift cards opened and gift cards issued on an Account. CK wants to permanently ensure the gift cards are unable to be moved across any other Account once it is created.

On the gift card object, what type of field should be created to support this requirement?

A. Formula

B. Master-detail relationship

C. Poll-up summary

D. Lookup relationship

Correct Answer: B

QUESTION 3

Universal containers is importing 1000 records into Salesforce. They want to avoid any duplicate records from being created during the import. How can these requirements be met?

A. Include a column in the import file that has either record names, Salesforce IDs, or external IDs that can be used to match records.

B. When importing the file, select the "Prevent Duplicates" option on the last step of the Import Wizard and import the file.

C. After importing all of the custom objects, run a duplicate check report, export the record to a CSV File, and run a mass delete to purge any duplicates.

D. After importing all of the custom objects, review all records created and manually merge or delete and duplicate record

Correct Answer: A

QUESTION 4

Which statement is true about an External ID field? (Choose two.)

A. The field contains unique record identifiers from a system outside of Salesforce.

B. The field must be unique since duplicate are not allowed within Salesforce.

C. The field must contain at least one number and at least one letter.

D. The field can be unique based on case-sensitive or case-insensitive values.

Correct Answer: AD

QUESTION 5

Which is true about encrypted fields?

A. A custom field can be converted to an encrypted field.

B. They are available in Validation Rules or Apex Scripts even if the user is not having the permission "View Encrypted Data".

C. Encrypted fields can be converted to other field types.

D. In Email Templates, if an encrypted field needs to be displayed without the mask character, the User who receives the email should have the View Encrypted Data permission.

Correct Answer: B
