QUESTION 1

Which of the following statements is false? Select the correct answer.

- A. The WS-I is an industry standards organization that provides basic profiles to help foster interoperability among solutions based on XML and Web services industry standards.
- B. OASIS is an industry standards organization that has developed a number of important technology specifications, including WS-BPEL and UDDI.
- C. The W3C is a standards organization that has developed a number of important technology specifications, including SOAP, WSDL, and WS-Addressing.
- D. The OAS-C is an industry standards organization that has developed a number of important technology specifications, including WS-Security and XML Schema.

Correct Answer: D

QUESTION 2

Which of the following statements is true? Select the correct answer.

- A. One way in which REST services are different from components is that components each expose their own technical interface (or technical contract), whereas REST services share a single uniform contract.
- B. One way in which REST services are different from components is that components typically exchange data using HTTP, whereas REST services typically exchange data using binary protocols.
- C. One way in which REST services are different from components is that components cannot themselves become services. Instead, components are used by services, such as REST services.
- D. One way in which REST services are different from components is that components cannot exchange data remotely (across server boundaries), whereas REST services are designed to be distributed.

Correct Answer: A

QUESTION 3

Identify what is wrong with this statement: "If I have 4 SOAP-based Web services, I must have 4 WSDL definitions and 4 XML schemas." Select the correct answer.

- A. SOAP-based Web services don't use XML schemas for their WSDL definitions.
- B. WSDL definitions can share the same XML schema and can also link to multiple XML schemas, so stating that 4 SOAP-based Web services must have 4 XML schemas is incorrect.
- C. Each WSDL definition must have at least 2 XML schemas, so the correct amount of required XML schemas in this case is 8.
- D. There is nothing wrong with this statement.

Correct Answer: B

QUESTION 4

The HTTP protocol can be used together with SOAP-based Web services and REST services. Select the correct answer.

- A. True
- B. False

Correct Answer: A

QUESTION 5

Service intermediaries can be further classified as _____ or _____ depending on whether they modify message content. Select the correct answer.

- A. event-driven, dynamic
- B. active, passive
- C. composed or decomposed
- D. read-oriented, write-oriented

Correct Answer: B
