## QUESTION 1

You are using Sitecore MVC to develop an area of a company's website that will require the use of Sitecore's Personalization Engine to change the rendering that is displayed to a visitor. What type of component binding will allow the Designer to use personalization to change the component?

- A. Static component binding, because you are able to give Authors the ability to change the presentation of the page.
- B. Static component binding, because you are able to ensure that content rendered in the placeholder is always the same when the component is selected.
- C. Dynamic component binding, because you are able to ensure that the content rendered in the placeholder is always the same.
- D. Dynamic component binding, because you are providing a placeholder to enable flexibility to change the components that make up the presentation of a page.

Correct Answer: D

---

## QUESTION 2

In a non-SXA website, you have created a layout definition item and want to designate the layout as part of the presentation details. According to Sitecore best practices, where should you set presentation details?

- A. Standard values
- B. On the individual items
- C. Rendering parameters
- D. Standard template

Correct Answer: A

---

## QUESTION 3

Which four statements are true about developing with the Sitecore ASP.NET Core Rendering SDK? (Choose four.)

- A. It enables the Content Delivery instance to handle all of the development workload.
- B. It allows you to create independent applications that render Sitecore content.
- C. It helps you build small, lightweight .NET Core applications for Sitecore.
- D. It enables you to remove ASP.NET from your solution.
- E. It allows you to extend Sitecore pipelines using .NET Core.
- F. It depends on the Sitecore Layout Service.
- G. It enables you to preview your code changes without having to restart the Sitecore environment.

Correct Answer: BCFG

---

## QUESTION 4

Sitecore utilizes several databases with various purposes. What data is stored in the Master database?

- A. Configuration information about the Sitecore user interfaces
- B. Only the latest versions of items that have been published
- C. .NET membership and security authorization tables
- D. All versions of all the content, including unpublished content

Correct Answer: D

---

## QUESTION 5

What is the purpose of item includes within Sitecore ContentSerialization module.json files?

- A. Includes specify which path or paths of the content tree should be serialized.
- B. Includes determine how and when the automatic schedule for module serialization is executed.
- C. Includes specify which other modules are dependencies for the given items.
- D. Includes specify how items are serialized and committed to source control.

Correct Answer: A
