QUESTION 1

You are the Scrum Master of a project to construct an IT Tech Park. This project requires adhering to stringent quality standards at every stage of development. A Scrum Core Team is formed for this project in which the Scrum Master is supposed to facilitate a "team first" mentality when it comes to quality. You must ensure all of the following to maintain quality in Scrum, EXCEPT:

- A. Any quality related error must be fixed only at the end to ensure that the deliverable is Done.
- B. Iterative Product development, repetitive testing, and documentation help ensure quality is inherent in each Done deliverable.
- C. Any quality requirement must consider the capacity and willingness of the organization to meet the business need.
- D. The changing needs of the customers must be incorporated during the increments.

Correct Answer: B

QUESTION 2

Which of the following about User Story Acceptance Criteria is true?

- A. User Stories are objective, and the Acceptance Criteria provides the subjectivity required for the User Story to be considered as Done.
- B. In the Sprint Review Meetings, the Acceptance Criteria provides the context for the Scrum Master to decide if a User Story has been completed satisfactorily.
- C. It is the Scrum Master who has to ensure that the Acceptance Criteria for a User Story are not changed by the Product Owner in the middle of a Sprint.
- D. It is the Scrum Team's responsibility to keep track of what changes are being made to the Acceptance Criteria even during the Sprint.

Correct Answer: C

User Story is Done according to the agreed upon Acceptance Criteria. Thus, the role of Acceptance Criteria in maintaining quality is critical and needs to be clearly understood by the team. It is the responsibility of the Scrum Master to ensure that the Acceptance Criteria for a User Story are not changed by the Product Owner in the middle of a Sprint. Partially completed User Stories are rejected as not Done and moved back into the Prioritized Product Backlog.

QUESTION 4

Collaboration is one of the Scrum principles. Which of the following are the three dimensions of this principle?

- A. Awareness, articulation, and appropriation
- B. Transparency, precision, and coordination
- C. Perfection, cooperation, and comprehension
- D. Honesty, responsiveness, and adaptability

Correct Answer: A

The core dimensions of collaborative work are as follows:

1.

Awareness -- Individuals working together need to be aware of each other's work.

2.

Articulation -- Collaborating individuals must partition work into units, divide the units among team members, and then after the work is done, reintegrate it.

3.

Appropriation -- Adapting technology to one's own situation; the technology may be used in a manner completely different than expected by the designers. Reference: <https://www.scrumstudy.com/whyscrum/scrums-collaboration>

QUESTION 5

A project on developing quality testing equipment for an agro-based industry will start with the Create Deliverables process. Which of the following are NOT inputs to the current process?

- A) Scrum Core Team B) Acceptance Criteria C) Impediment log D) Length of Sprint
- A. A and B
- B. B and D
- C. A and C

D. B and C

Correct Answer: C
