QUESTION 1

Is it possible to write to a text file without using the Write Text File activity?

A. No

B. Yes, using the Invoke Method activity

C. Yes, with the Invoke Power Shell activity

Correct Answer: BC

QUESTION 2

Please select the incorrect statement about Rethrow activity.

A. Rethrow activity throws an exception previously caught in an exception handling block.

B. Rethrow activity must be a child of a Catch handler of a TryCatch activity.

C. Rethrow activity is used when additional activities need to be added before the exception is thrown.

D. You can specify which error type should be thrown in Rethrow activity.

Correct Answer: D

Rethrow activity is used when additional activities need to be added before the exception is thrown. You cannot specify the type of error to be thrown. Instead, you place Rethrow activity in the Catch handler of a TryCatch, and the type of the error is the same as the type of the previously caught error. Please note, that the Finally block is not executed if the error was rethrown. Example: Before an unexpected System Exception is thrown, the error is caught in TryCatch activity, a mail message is sent to the IT support team, and then the error is rethrown to end the execution.

QUESTION 3

Is it possible to retrieve the color of a specific Excel cell?

A. No, The color cannot be retrieved from a workbook

B. Only with an OCR Engine

C. Yes, by using Get Cell Color

Correct Answer: C

QUESTION 4

A developer wants to add items to a list of strings using the Invoke Method activity. The list is declared as follows:

Name	Variable type	Scope	Default
Colors	List<String>	AddDataToList	*Enter a VB expression*

The Invoke Method has the following properties:

System.Activities.Statements.InvokeMethod

Common

DisplayName	Invoke Method

Misc
