QUESTION 1

Scenario: A Citrix Engineer needs to ensure that the desktop for the HR department containing confidential information is only accessible when endpoint analysis scans are successful on the endpoint. The engineer also needs to configure the Smart Access filter on the Delivery Group. The engineer needs to use the _____ for the farm name and _____ as the filter for smart access. (Choose the correct option to complete the sentence.)

- A. NetScaler NSIP; Traffic Policy
- B. NetScaler MIP; Clientless Access Policy
- C. NetScaler Hostname; Authentication Policy
- D. NetScaler Virtual Hostname; Session Policy

Correct Answer: D

QUESTION 2

Scenario: A Citrix Engineer has configured external access to Citrix StoreFront through NetScaler and a corresponding store on the StoreFront servers with user validation on NetScaler. When testing the external access, the engineer is able to log on, but receives this error message:

Access is denied due to invalid credentials.

The engineer validates that root SSL certificates are in place both on NetScaler and the StoreFront server.

Which configuration step should the engineer take to solve this issue?

- A. Configure STA server entries on the NetScaler virtual server.
- B. Upgrade firmware on the NetScaler to at least version 10 build 69.4.
- C. Enable the '\\Request tickets from two STAs\\' option when creating the store.
- D. Add the NetScaler VIP and external access URL to the hosts file on the StoreFront servers.

Correct Answer: D

QUESTION 3

Scenario: A Citrix Engineer must use Provisioning Services to provision 50 desktop OS machines. The engineer has installed and configured two Provisioning Services servers to guarantee high availability and now needs to configure the write cache location of the virtual desktops so that failover is possible in case one of the Provisioning Services servers fails.

Which three write cache locations could the engineer choose? (Choose three.)

- A. In the RAM of the virtual desktop
- B. On a Citrix ShareFile storage zone

- C. On a persistent disk attached to the virtual desktop
- D. On the local disk of both Provisioning Services servers
- E. On a fileshare connected to both Provisioning Services servers

Correct Answer: ACE

QUESTION 4

Scenario: CCH has an Active Directory forest with three geographically-assigned domain locations under the parent domain, which is called CCH.com. CCH recently acquired another medical company that has its own Active Directory structure. A Citrix Engineer is asked to deploy virtual desktops to the newly acquired company.

The engineer should deploy virtual desktops to users in the newly acquired company by using a _____ trust relationship. (Choose the correct option to complete the sentence.)

- A. domain
- B. one-way
- C. forest-wide
- D. bi-directional external

Correct Answer: D

QUESTION 5

Scenario: A Citrix Engineer needs to shut down a virtual machine to add an extra vCPU. High availability is enabled on the resource pool and HA restart priority is set to \\Automatic\\ for the virtual machine. What should the engineer do in order to shut down the virtual machine?

- A. Force shutdown for the virtual machine.
- B. Stop the Citrix Xen Guest Agent service.
- C. Set the HA restart priority to do not restart.
- D. Set the HA start order to a number higher than 0.

Correct Answer: C

QUESTION 6

HTTPS is used in a StoreFront deployment when _____ and _____ are required. (Choose the two correct options to complete the sentence.)

- A. SmartCard Access
- B. explicit authentication

- C. Domain Single Sign-On
- D. user certificate authentication

Correct Answer: AD

QUESTION 7

Which three pieces of information are passed on from the pool master to the XenServer host joining the pool? (Choose three.)

- A. VLANs
- B. Bonded interfaces
- C. Shared storage repositories
- D. IP addresses of management NICs
- E. Location of the management interface

Correct Answer: ABC

QUESTION 8

Scenario: A Citrix Engineer needs to configure NetScaler to provide remote access for the remote staff at CCH. After creating a NetScaler VIP address with associated policies and importing an SSL certificate from a trusted certificate authority onto the NetScaler, the engineer browses the URL externally, but finds that the Site is inaccessible.

The engineer must ensure that the _____ is bound to the _____ object. (Choose the correct option to complete the sentence.)

- A. server certificate; server
- B. server certificate; vserver
- C. vserver certificate; server
- D. vserver certificate; vserver

Correct Answer: B

QUESTION 9

A Citrix Engineer needs to deploy static machines with Personal vDisk to some users in the head office at CCH. Which desktop delivery model should the engineer select?

- A. Local VM
- B. Server OS

- C. Remote PC
- D. Desktop OS

Correct Answer: D

QUESTION 10

Which two components in a virtual desktop implementation communicate frequently with a SQL database? (Choose two.)

- A. XenServer
- B. Citrix StoreFront
- C. Delivery Controller
- D. Provisioning Services

Correct Answer: CD

QUESTION 11

Scenario: Users need to access hosted desktops or applications using the browser on the endpoints. A Citrix Engineer needs to configure Citrix Receiver for Web because all users are accessing their applications using a browser and email-based account discovery is NOT implemented.

What should the engineer do to install Citrix Receiver for Web and replace Citrix Receiver?

- A. Extract the citrixreceiver.exe file.
- B. Create a custom GPO import icaclient.adm.
- C. Rename CitrixReceiver.exe to CitrixReceiverWeb.exe.
- D. Add a scheduled task, removing C:\program Files(x86)\Citrix\ICAClient\CDViewer.exe.

Correct Answer: C

QUESTION 12

A Citrix Engineer must configure _____ and _____ policy settings in Group Policy Object. (Choose the two correct options to complete the sentence.)

- A. printer redirection
- B. client file redirection
- C. Microsoft Application Virtualization (App-V) servers
- D. registering virtual desktops with a Delivery Controller

Correct Answer: CD

QUESTION 13

Which two commands could a Citrix Engineer use to troubleshoot licensing related issues when deploying a Delivery Controller? (Choose two.)

- A. lmdiag -c
- B. lmdown -c
- C. lmhostid -ether
- D. lmhostid -hostname

Correct Answer: AD

QUESTION 14

Scenario: Two servers need to be added to a XenServer resource pool. The Procurement department is only able to place an order for the newer generation servers.

What are three necessary considerations when adding the hosts to the current pool? (Choose three.)

- A. The servers need to have the same amount of RAM.
- B. CPUs need to be from the same vendor as the existing CPUs.
- C. Servers need to be from the same vendor as the existing servers.
- D. The features of the older CPU must be a subset of the newer CPU.
- E. The CPU of the new server must have Intel or AMD Migration support.

Correct Answer: BDE

QUESTION 15

Scenario: A Citrix Engineer needs to implement Provisioning Services to support multiple streaming NICs for redundancy. After completing the Provisioning Services Configuration Wizard, the engineer notices that only one of the configured NICs is streaming vDisks. The engineer has verified that the backend network topology is functioning correctly and that the issue resides on the server configuration.

Which Provisioning Services networking consideration did the engineer fail to follow?

- A. The IP addresses of the NICs reside in two different subnet masks.
- B. The IP addresses of the NICs reside in two different subnets and have the same masks.
- C. A range of 25 consecutive ports was NOT opened on the firewall for both IP addresses of the NICs.

D. A range of 40 consecutive ports was NOT opened on the firewall for both IP addresses of the NICs.

Correct Answer: A

QUESTION 16

How should a Citrix Engineer use Citrix Director to view current and historical logon times for an individual client?

- A. From the farm latency under the Trends page
- B. From the Activity Manager panel under the Help Desk page
- C. From the Logon Duration panel under the User Details page
- D. From the Activity Manager panel under the Machine Details page

Correct Answer: C

QUESTION 17

Scenario: A Citrix Engineer needs to deploy XenDesktop to deliver a pool of 100 virtual desktops to users. The engineer needs to maintain a single shared image for all 100 virtual desktops. The engineer also needs to ensure that users assigned to these pooled desktops have the capability to customize their desktops and to install applications permanently. Additionally, the storage platform does NOT have thin-provisioning capabilities.

Which two technologies should the engineer implement to meet the above requirements? (Choose two.)

- A. Personal vDisk
- B. Remote PC Access
- C. Provisioning Services
- D. Citrix Profile Management
- E. Machine Creation Services

Correct Answer: AC

QUESTION 18

Using Citrix Studio, which two pieces of information are required to connect a Delivery Controller to a hosting infrastructure? (Choose two.)

- A. Hypervisor address
- B. Hypervisor credentials
- C. Hypervisor management VLAN
- D. Hypervisor high-availability server address

Correct Answer: AB

QUESTION 19

Users who are testing the hosted shared desktop at CCH report that logon time is unacceptably slow. Which three best practices should a Citrix Engineer implement to optimize the logon time for the hosted shared desktops? (Choose three.)

- A. Enable Profile Streaming.
- B. Enable Active Write Back.
- C. Store the UPM profiles on a highly available CIFS share.
- D. Replace logon scripts with GPO preferences where possible.
- E. Redirect common folders such as Documents, Music, and Pictures.

Correct Answer: ADE

QUESTION 20

A Citrix Engineer needs to update the version of Citrix Receiver for Windows provided by Citrix StoreFront. Which files should the engineer update?

- A. Citrix Receiver files on the Delivery Controller
- B. Citrix Receiver files in C:\inetpub\wwwroot\Citrix\store
- C. Citrix Receiver files for every host in the machine catalog
- D. Citrix Receiver files in C:\Program Files\Citrix\Receiver StoreFront\Receiver Clients\Windows

Correct Answer: D
