QUESTION 1

An administrator of iOS supervised devices has noticed that devices are checking in regularly but are failing the Last Compromised Scan compliance policy. The administrator is fine with having slight disruptions to users but does not want

any interaction from the user to be required.

The administrator decides to use an action in the Last Compromised Scan compliance policy that would force the device to report back the compromised status without requiring user input.

Which action in the Last Compromised Scan compliance policy should be used?

- A. Assign a sensor to the device to request the compromised status
- B. Assign the command to Request Device Check-In
- C. Assign a push notification to the device to request the compromised status
- D. Assign a compliance profile containing a single app payload for the Hub application

Correct Answer: C

QUESTION 2

Which step is required to configure Digital Employee Experience Management (DEEM)?

- A. Ensure devices ownership type is set to employee-owned
- B. Enable DEEM Workspace ONE Access
- C. Integrate the productivity app with Workspace ONE SDK
