QUESTION 1

You have a deployment of Microsoft System Center 2012 R2 Configuration Manager. All site system roles are deployed. All client computers have the Configuration Manager client installed.

An application named App1 is deployed to all of the client computers. Your organization licenses App1 annually from the application vendor. The licenses are based on the number of App1 installations that exist in the organization at the end of the fiscal year.

You need to identify on which computers App1 is not being used.

What should you create first?

- A. a configuration baseline
- B. a software metering rule
- C. a software category
- D. an automatic deployment rule

Correct Answer: B

QUESTION 2

You need to implement the Asset Intelligence reports to meet the technical requirement of Customer1. What should you do?

- A. On all client computers, enable success auditing for logon events.
- B. On the primary site server, create a custom client settings object.
- C. On all client computers, enable success auditing for account logon events.
- D. On the primary site server, modify the SMS_def.mof file.

Correct Answer: A

QUESTION 3

Your network contains one Active Directory domain. The domain contains a deployment of Microsoft System Center 2012 R2 Configuration Manager.

You need to update the Configuration Manager catalog from the information in System Center Online.

Which site system role should you add?

- A. Application Catalog web service point
- B. Asset intelligence synchronization point
- C. Application Catalog website point
- D. Windows Intune connector

Correct Answer: B

QUESTION 4

Which server must host the WSUS database for the additional software update point of Customer2?

- A. Server2
- B. Server4
- C. Server5
- D. Server11

Correct Answer: C

QUESTION 5

You need to ensure that the personal devices that run Windows 8.1 meet the corporate security policy requirements.

What should you do first?

- A. Create a federated trust with Windows Azure Active Directory.
- B. Create a federated identity relationship with the Microsoft Federation Gateway.
- C. Enroll the device in Windows Intune.
- D. Join the devices to the domain by using an offline domain join.

Correct Answer: C

QUESTION 6

You need to recommend a solution for deploying applications to the virtual desktops. What should you include in the

recommendation?

- A. Appv_client_setup_rds.exe with the /SHAREDCONTENTSTOREMODE parameter
- B. Set-AppvClientConfiguration with the -LocationProvider parameter
- C. Appv_client_setup.exe with the /SHAREDCONTENTSTOREMODE parameter
- D. Set-AppvClientConfiguration with the -AllowHighCostLaunch parameter
- E. Set-AppvClientConfiguration with The -Autoload parameter
- F. appv_client_setup_rds.exe with the /ROAMINGFILEEXCLUSIONS parameter

Correct Answer: C

QUESTION 7

You need to configure Asset Intelligence. The solution must meet the Configuration Manager requirements. What should you do?

- A. From the Assets and Compliance workspace in the Configuration Manager Console, edit the inventory classes.
- B. From the Administration workspace in the Configuration Manager Console, enable the Check Application Title with Inventory Information Asset Intelligence maintenance task.
- C. From the Administration workspace in the Configuration Manager Console, enable the Summarize Installed Software Data Asset Intelligence maintenance task.
- D. On the client computers, enable the auditing of successful logon events.

Correct Answer: A

QUESTION 8

You need to recommend a solution for enabling licensing reports based on the compliance requirements.

Which two actions should you include in the recommendation? Each correct answer presents part of the solution.

- A. From the Assets and Compliance workspace of the Configuration Manager console, import license data in the CSV format.
- B. From the Administration workspace of the Configuration Manager console, modify the Default Client Settings.
- C. From the Assets and Compliance workspace of the Configuration Manager console, edit the inventory classes.
- D. From the Administration workspace of the Configuration Manager console, modify CCS3.
- E. From the Assets and Compliance workspace of the Configuration Manager console, import license data in the XML

format.

Correct Answer: AD

QUESTION 9

You need to resolve the Windows update issue. What should you do?

- A. Modify the Group Policy objects (GPOs) in Active Directory.
- B. Synchronize software updates from Configuration Manager.
- C. Create an automatic deployment rule.
- D. Add distribution points to each branch office.

Correct Answer: D

QUESTION 10

You need to meet the application requirements of App4. What should you do first?

- A. Create a Mobile Device Security Policy.
- B. Upload App4 to Windows Intune.
- C. Set the Mobile Devices Management Authority.
- D. Install the Windows Intune client software.

Correct Answer: C

QUESTION 11

You need to meet the application requirements of App1. What should you do?

- A. Modify the Parameters properties of the App1 RemoteApp program.
- B. Run the Set-WebBinding cmdlet.
- C. Run the Set-RDRemoteApp cmdlet.
- D. Modify the Application Settings of the RDWeb web application.

Correct Answer: C

QUESTION 12

Your company purchases an application named App1. App1 is installed by using a Windows Installer (MSI) package. App1 will be uninstalled and updated frequently.

You need to deploy App1 by using Microsoft System Center 2012 R2 Configuration Manager.

What is the best type of object to use? More than one answer choice may achieve the goal. Select the BEST answer.

- A. an application
- B. an automatic deployment rule
- C. a package
- D. a configuration item

Correct Answer: B

QUESTION 13

You have a Microsoft System Center Configuration Manager deployment.

You are creating an application named App1.

You need to configure App1 to be a Microsoft Application Virtualization (App-V) deployment.

Which installation file should you specify for App1?

- A. App1.stf
- B. App1.appv
- C. App1.msi
- D. App1.xml

Correct Answer: B

QUESTION 14

You need to identify which Windows Intune Software Publisher parameter must be specified to deploy the updates to App1. Which parameter should you identify?

- A. a custom detection rule

- B. the architecture
- C. a default detection rule
- D. command-line arguments

Correct Answer: B

QUESTION 15

You need to configure the client health settings to meet the compliance requirements. What should you do on the client computers?

- A. Configure the Group Policy preferences.
- B. Run client.msi and specify the DISABLESITEOPT parameter.
- C. Create a configuration baseline.
- D. Run client.msi and specify the NOTIFYONLY parameter.

Correct Answer: D

QUESTION 16

You have a deployment of Microsoft System Center 2012 R2 Configuration Manager and System Center Updates Publisher 2011.

You plan to deploy updates to Adobe Reader version 11.

You need to ensure that the metadata for the Adobe Reader updates is downloaded locally to the Updates Publisher server.

Which two actions should you perform? Each correct answer presents part of the solution.

- A. Create a new publication.
- B. Run the Add Software Update Catalog wizard.
- C. Modify the Update Server options.
- D. Add a catalog.
- E. Create a rule.
- F. Modify the Trusted Publishers options.

Correct Answer: AB

QUESTION 17

You need to recommend a solution for updating App1. What should you include in the recommendation?

- A. Microsoft Updates Publisher 2011
- B. the System Update Readiness Tool
- C. Windows Intune
- D. System Center 2012 R2 Operations Manager

Correct Answer: C

QUESTION 18

You need to configure the monitoring of Collection1 to meet the technical requirement of Customer2. What should you modify from the Configuration Manager Console?

- A. the Subscriptions settings in the Monitoring workspace
- B. the Alerts settings of the Collection1 properties in the Assets and Compliance workspace
- C. the Queries settings in the Monitoring workspace
- D. the General settings of the Collection1 properties in the Assets and Compliance workspace

Correct Answer: B

QUESTION 19

You need to design a solution to deploy App3.

What should you do?

- A. Publish App3 as a RemoteApp program.
- B. Assign App3 to users by using a Group Policy object (GPO)
- C. Publish App3 as an App-V package.
- D. Install App3 locally on the client computers.

Correct Answer: A

QUESTION 20

You deploy the Endpoint Protection client in Microsoft System Center 2012 R2 Configuration Manager to all client computers. You plan to deploy an antimalware policy to the users in the research department.

You need to ensure that the research department users can exclude some processes from the Endpoint Protection client manually.

Which settings should you modify in the antimalware policy?

- A. advanced
- B. default actions
- C. threat overrides
- D. real-time protection

Correct Answer: A
