QUESTION 1

A developer is working on a task with outgoing change sets in a loaded repository workspace when a manager identifies a new, critical task that must be performed immediately. There are currently no unresolved changes. Without creating another repository workspace, how can the developer safely work on the critical task without losing the pending changes of the initial task?

- A. The user suspends the current change sets and starts working in a new change set.
- B. The user reloads the repository workspace and starts working in a new change set
- C. The user creates a new change set, selects it as the current change set and checks in all changes.
- D. The user loads the repository workspace in a different client and starts working in a new change set.

Correct Answer: B

QUESTION 2

A development has organized the source code into components and found that there is a strong dependency or containment relationship between two of the components. What action could the development team take to establish this relationship?

- A. Take a baseline of both components.
- B. Update both component's Properties view.
- C. Utilize a work item to link both components.
- D. Create the Child component as a subcomponent of the parent.

Correct Answer: B

QUESTION 3

Management is asking for report describing all RTC users, team areas, team members and corresponding process roles, as well as team area administrators for an RTC project area. How should the report be created?

- A. Generate Runtime Report using the RTC Eclipse client.
- B. Use the "reptools-jts" utility with the "exportUsers" option.
- C. Export users from the Team Organization View in the RTC Eclipse client.
- D. Export the users from the "Active Users" menu on the JTS Application Administration Web Page.

Correct Answer: D

QUESTION 4

A report author needs to produce a JRS report that only shows high priority work items. How can this be accomplished?

- A. Set up traceability links.
- B. Link the report to a query.
- C. Limit the project scope of the report
- D. Add an attribute condition to the report.

Correct Answer: B

QUESTION 5

A developer is working on source code changes and would like to test them using an existing build definition.

The developer, however, does not want the testing to impact the overall build definition status or notify subscribers.

How can this be accomplished?

- A. Request a personal build.
- B. Restart the build engine in test mode.
- C. Set the build result's type to Private.
- D. Define a pruning policy on the build definition.

Correct Answer: A

QUESTION 6

An administrator would like to prevent source code check-ins without a review and has added the Code Review Summary to the work item editor presentation. What additional step must be taken?

- A. create Prevent Check-ins rule
- B. create Approval Template
- C. add appropriate preconditions
- D. add Approval state to workflow

Correct Answer: B

QUESTION 7

A user loaded a repository workspace that flows with the team\\'s stream. The user can see an incoming change for the file CoreClass in the RTC client, but decides to edit this file and check in the change. How does the Jazz SCM handle this situation?

- A. A potential conflict is detected and the user is prevented from checking in the file CoreClass that already has an incoming change.
- B. The conflict for the file CoreClass is detected in the incoming and outgoing change sets and the changes are automatically merged for the user.
- C. A conflict between the incoming and outgoing change sets for the file CoreClass is detected and the conflict is shown in the pending changes view.
- D. The incoming changes for the file CoreClass are detected and the file is automatically set to read-only, preventing the user from accidentally editing it.

Correct Answer: D

QUESTION 8

An organization plans to have a large number of project areas. The process engineering team plans to Change roles as well as the associated permissions. The organization does not allow changes to a project area process directly on the production system and needs to minimize the work to deploy a new process to all the project areas.

How can this be accomplished?

- A. Use Process Sharing.
- B. Extract the Process Templates.
- C. Export and import the Process Templates.
- D. Copy process XML to each production project area.

Correct Answer: B

QUESTION 9

A developer has created a repository workspace on the server and wants to be able to access the files locally via installed tools such as editors and compilers. What action must the developer take to accomplish this?

- A. Take a baseline of the components.
- B. Load the contents of the repository workspace.
- C. Check out the files and save copies to the file system.

D. Modify the stream\\'s flow target to match the repository workspace.

Correct Answer: A

QUESTION 10

Management has requested that two RTC evaluation servers and two RTC departmental servers be deployed. Each RTC server will have a firewall blocking access to jazz.net and requires different installation packages. What is the correct installation option?

- A. use the Web Installer
- B. use Enterprise Platform Installer
- C. use IBM Installation Manager Repositories
- D. use plain .zip files for the JTS and CCM Application

Correct Answer: C

QUESTION 11

How does RTC support agile planning?

- A. RTC support work item based configurable agile planning using time tracking, Gantt charts, and out of the box custom reports.
- B. RTC supports sprint planning with configurable plan types and plan views, an agile scheduler, complexity management, and ranking.
- C. RTC supports agile planning by importing and exporting plans to Microsoft Project to calculate sprint planning and user allocation to tasks.
- D. RTC supports work item based agile cross project planning including predecessor/successor linking, prioritization and critical path analysis.

Correct Answer: A

QUESTION 12

An administrator has created a new type of work item with its own unique workflow. When the users begin to use this new work item type, the available states and actions are not from the expected workflow. How can the administrator correct this?

- A. Compile the workflow source.

- B. Deploy the new work item type.
- C. Bind the workflow to the work item type.
- D. Publish the workflow for the work item type.

Correct Answer: C

QUESTION 13

A development team is using the RTC web interface to update plans and work items. One user notices that recent work item changes are not rendered in the web browser. What is the reason for this?

- A. The web browser is caching the work items.
- B. The data warehouse has not yet been updated.
- C. The web browser version is no longer supported.
- D. User does not have permission to view the work item.

Correct Answer: A

QUESTION 14

A user needs to export the results from a work item query in the RTC Eclipse client. Which of the below file formats can be used?

- A. XML file
- B. PDF document
- C. Word document
- D. Spreadsheet format (CSV)

Correct Answer: C

QUESTION 15

An administrator is evaluating different templates and needs to select one for use on a new project area. Which of the following is the first consideration?

- A. The team area to release relationship.
- B. The number of teams in the project area.

- C. The development process of the software team.
- D. The geographical distribution of team members.

Correct Answer: D
