QUESTION 1

Which of the following is not a valid WebDAV URL?

- A. /wps/mycontenthandler/dav/fs-type1
- B. /wps/mycontenthandler/dav/themelist/
- C. /wps/mycontenthandler/dav/portal
- D. /wps/mycontenthandler/dav/skinlist

Correct Answer: C

QUESTION 2

Which one of the following statements is true regarding the XML configuration interface?

- A. The user requires the manager role on the virtual resource XML_ACCESS and the security administrator role on the virtual resource PORTAL.
- B. The user requires the manager role on the virtual resource XML_ACCESS and the security user role on the virtual resource PORTAL.
- C. The user requires the user role on the virtual resource XML_ACCESS and the security administrator role on the virtual resource PORTAL.
- D. The user does not require the manager role on the virtual resource XML_ACCESS.

Correct Answer: A

QUESTION 3

What is the SSO realm name for a standalone LDAP security configuration?

- A. DefaultWIMFileBasedRealm
- B. WMMRealm
- C. DNS Domain name
- D. LDAP hostname:port

Correct Answer: D

QUESTION 4

When configuring a federated LDAP repository rather than a stand-alone LDAP repository, what are some of the differences?

- A. Administrators must select the Federated LDAP check box in the IBM WebSphere Integrated Solutions console.
- B. Federated LDAP properties begin with federated.ldap whereas stand-alone LDAP properties begin with standalone.ldap in the wkplc.properties file, but both still use the validate-ldap configuration task for validation and the create-wp-ldap task for creating the LDAP repository.
- C. LDAP properties (whether federated or stand-alone) begin with ldap, but federated LDAP uses the validate-federated-ldap task for LDAP validation, whereas stand-alone LDAP uses the validate-standalone-ldap task for LDAP validation. Both use the wp-modify-ldap-security task for establishing LDAP connection.
- D. Federated LDAP properties begin with federated.ldap, whereas stand-alone LDAP properties begin with standalone.ldap in the wkplc.properties file. Different configuration tasks are used both for LDAP validation and establishing an LDAP connection.

Correct Answer: D

QUESTION 5

IBM WebSphere Portal 8.0 Personalization sends published rules across HTTP to a servlet which resides on each personalization server. Which of the following statement is not a supported configuration?

- A. Host and Target Systems in a clustered environment
- B. Host and Target Systems on IPv6 protocol
- C. Host and Target Systems connected to different LDAP's
- D. Host and Target Systems on different network segments (VLAN)

Correct Answer: C

QUESTION 6

Dan is going to set up an IBM WebSphere Portal server only for developing self-contained portlets and portlet applications. Which of the following options is the best choice for this scenario?

- A. Perform a full installation because self-contained portlets and portlet applications make a full installation necessary.
- B. Perform a base installation because self-contained portlets and portlet applications make a full installation unnecessary.
- C. Perform a full installation and then run the ConfigEngine development-mode task.
- D. Perform a full installation and then disable all the business portlets that are not needed during development.

Correct Answer: B

QUESTION 7

A portlet is available to multiple virtual portals. However, Noah does not want the marketing team virtual portal to utilize this portlet. Which of the following options offers the ability to restrict the portlet from the marketing team's virtual portal

users?

- A. IBM WebSphere Portal access control
- B. Portlet security control
- C. Virtual portal restriction
- D. Virtual Member Manager

Correct Answer: A

QUESTION 8

To prepare the configuration tasks for a WebSphere Portal server to use a remote database, which option best describes the following properties files that need to be modified?

- A. wkplc_comp.properties
- B. wkplc_comp.properties and wkplc_dbtype.properties
- C. wkplc_dbtype.properties, wkplc_dbdomain.properties and wkplc.properties
- D. wkplc_comp.properties, wkplc_dbtype.properties, and db.config.properties

Correct Answer: C

QUESTION 9

Which of the following statements correctly describes how IBM WebSphere Portal's functionality is implemented on the IBM WebSphere Application Server?

- A. WebSphere Portal is deployed as a stand-alone, Java application using WebSphere Application Server client libraries.
- B. WebSphere Portal is deployed as an enterprise application on the WebSphere Application Server.
- C. WebSphere Portal is a stand-alone web server framework and is not related to WebSphere Application Server.
- D. WebSphere Portal is deployed as a portlet to WebSphere Application Server's portlet container.

Correct Answer: B

QUESTION 10

Bill wants to set up a portal farm with four server instances. Which of the following statements regarding portal farms is true?

- A. Using a shared installation, all four server instances that become a part of the portal farm can be installed on different operating systems.

- B. Session persistence is enabled by default on all four server instances..
- C. All the server instances need to be configured such that they have an identical security configuration and user repository, such as LDAP.
- D. Portal and content caches across all four server instances are replicated seamlessly.

Correct Answer: C

QUESTION 11

IBM WebSphere Portalsupports multiple ways for portlets to exchange or share information. Select the option that does not describe this functionality.

- A. Public render parameters allow JSR 286 portlets to share navigational state information.
- B. Portlet Wires are used to direct the information flow between portlets that communicate using JSR 286 Portlet events or the WebSphere Portal Cooperative portlets API.
- C. Cooperative portlets represent an IBM-specific API for publish/subscribe communication between JSR 168 and JSR 286portlets.
- D. Portlet events provide a powerful and flexible publish/subscribe mechanism for communication between JSR 286 portlets.

Correct Answer: C

QUESTION 12

Which of the following statements about setting wires on an IBM WebSphere Portal page is correct?

- A. A wire can only be created from oneportlet to another portlet on the same page.
- B. A page can have source and target portlets wires configured automatically.
- C. Wires can be created between a source JSR 168 portlet and a target legacy IBM API portlet.
- D. Wires can be either public (available to all users) or private (available to a single user).

Correct Answer: D

QUESTION 13

Which of the following statementsabout URL mapping is true?

- A. A single portal page can have only one friendly URL.
- B. Friendly URLs do not have control over setting the language for a page.
- C. Users must have the Editor role for a page to create a URL mapping context on that page.

D. A friendly URL is a valid URL mapping context.

Correct Answer: D

QUESTION 14

Which one of the following best describes how Theme Customization works in IBM WebSphere Portal 8.0?

- A. Static HTML Files are contained in the WAR File.
- B. Static resources are deployed to WebDAV.
- C. Theme JSP files are deployed to WebDAV.
- D. Static and dynamic resources are deployed to WebDAV.

Correct Answer: B

QUESTION 15

Which one of the following statements is true about Virtual Portals?

- A. Separation between Virtual Portals cannot be achieved by scoping the portal resources of the Virtual Portals
- B. Scoping means making portal resources available uniquely and separately to individual Virtual Portals and their users
- C. The user population can be scoped to one or more specific Virtual Portals
- D. All types of portal resources can be scoped to a particular Virtual Portal
- E. B and C
- F. A, B and D

Correct Answer: E
