100% Passing Guarantee  
100% Money Back Assurance

Following Questions and Answers are all new published by SAP Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

Model configuration allows the attributes of a master data type to be assigned as key figures. Which features are relevant for this type of object?

- A. This object contains user-defined criteria that monitor execution of business plans.
- B. This object provides a single value for a unique planning combination.
- C. This type of key figure is not usually stored and it cannot be set to editable.
- D. This object is not exposed to the user in planning views or modeling.

Correct Answer: B

---

**QUESTION 2**

Which features apply to quota violations modeled with the optimizer?

- A. Quotas require sourcing ratios to be maintained.
- B. Min and Max Quotas have to be the same as sourcing ratios.
- C. Quota violation cost is maintained as an attribute as a key figure.
- D. Quotas can be modeled for sourcing location, production, and consensus demand.

Correct Answer: A

---

**QUESTION 3**

Which of the following data can be tracked using a change-history-enabled key figure? Note: There are 3 correct Answers to this question.

- A. Reason code
- B. Scenario ID
- C. Attributes
- D. Key figure type
- E. Modified date

Correct Answer: ACE

---

**QUESTION 4**

Analytics charts are created by the user in the Advanced Analytics application. What actions are possible in the

Advanced Analytics app? Note: There are 2 correct Answers to this question.

- A. Group data.
- B. Merge charts together.
- C. Open graphics in Excel.
- D. Apply filters on your data.

Correct Answer: AD

---

**QUESTION 5**

Which of the following modes can you use when creating a constrained plan? Note: There are 2 correct Answers to this question.

- A. Profit maximization
- B. Delivery maximization
- C. Resource maximization
- D. Production maximization

Correct Answer: AB

---

**QUESTION 6**

Which of the following checks for master data and key figures does the Check Mode algorithm trigger? Note: There are 3 correct Answers to this question.

- A. It checks whether the sourcing in the Production Source Item Master Data type exists.
- B. It checks whether the location resource specified in the master data forms a cycle in the supply chain network.
- C. It checks whether the heuristic detects cycles formed by nodes (such as location products) in the supply chain network.
- D. It checks whether the location products specified in the master data are connected by customer sourcing rules within the supply chain network.
- E. It checks whether the required planning level master data exists for a subset of input key figures.

Correct Answer: CDE

---

**QUESTION 7**

Which of the following solutions are feasible when using the time series supply optimizer? Note: There are 3 correct Answers to this question.

- A. Violation of minimum aggregated inventory values
- B. Not adhering to maximum transport values
- C. Not-fully satisfied demands
- D. Not respecting production capacity
- E. Violation of minimum resource utilization

Correct Answer: ACE

---

#### QUESTION 8

What options for copying will be available to you? Note: There are 2 correct Answers to this question.

- A. Creation of a partial copy with a new ID along with the time profile and required master data types
- B. Creation of a partial copy with a new ID along with the time profile and all master data objects
- C. Creation of an exact copy with a new ID, with the time profile and master data types shared with the source
- D. Creation of an exact copy with a new ID along with the time profile and master data types

Correct Answer: AB

---

#### QUESTION 9

How can you make charts and dashboards private?

- A. Choose only relevant key figures and filters in the Analytics Advanced application.
- B. Enable the relevant settings in the global configuration parameters.
- C. Set restrictions for charts in the Permission filter application.
- D. Enable the relevant settings in the Analytics Advanced and Dashboards Advanced applications.

Correct Answer: B

---

#### QUESTION 10

Which SAP IBP planning operator can be run to delete planning objects in a certain version?

- A. Purge Key Figure Data
- B. Purge Key Figure Data Outside Planning Area Planning Horizon
- C. Purge Non-Confirming Data
- D. Purge Master Data

Correct Answer: A

---

## QUESTION 11

Which of the following are features of the SandOP process templates? Note: There are 2 correct Answers to this question.

- A. The number of steps in a process template is the same for all implementations.
- B. Each step depicted in the template can have tasks associated with it.
- C. All process templates are assigned to dashboards.
- D. New instances of templates allow for re-use of the same processes again.

Correct Answer: BC

---

## QUESTION 12

Which of the following settings can you use in your supply planning background job triggered from Excel? Note: There are 2 correct Answers to this question.

- A. Planning unit
- B. UOM to ID
- C. Target currency
- D. Type of algorithm to use

Correct Answer: BD

---

## QUESTION 13

What does ABC/XYZ segmentation allow you to do? Note: There are 2 correct Answers to this question.

- A. Assign more appropriate inventory algorithms to planning objects.
- B. Tailor your forecast strategy and inventory optimization to segment characteristics.
- C. Identify inventory items that require closer attention.
- D. Analyze forecast accuracy by product class.

Correct Answer: BD

---

## QUESTION 14

What function would you use to configure a year-to-date calculation?

- A. Cumulative Aggregation
- B. Dynamic Rolling Aggregation
- C. Rolling Aggregation
- D. Last Period Aggregation

Correct Answer: A

---

## QUESTION 15

Which library is used by the forecasting engine for the demand sensing algorithm?

- A. Predictive analytics library
- B. Demand library
- C. Supply chain algorithm library
- D. Heuristics library

Correct Answer: C
