QUESTION 1

In addition to introducing the new team member, you have decided to raise motivation.

Which of the measures listed below would be the best measure to take in order to increase the motivation of the team?

- A. Provide more time for testing in the schedule
- B. Allow people to take some time off
- C. Introduce entry criteria to the testing phase
- D. Organize a meeting with senior management in which they address the importance of good testing for this project

Correct Answer: D

QUESTION 2

As a result of the RAD based development approach, the test manager has decided to change the risk mitigation approach.

Which test technique might be most appropriate to use?

- A. Decision Table Testing
- B. Boundary Value Analysis
- C. Error Guessing
- D. Exploratory Testing

Correct Answer: D

QUESTION 3

What is the Risk Priority Number for risk item number 2?

- A. 16
- B. 2
- C. 1
- D. 63

Correct Answer: D

QUESTION 4

Regarding the process described above, what is the most important recommendation you would make using IEEE 1044 as a guide?

- A. No priority or severity assigned
- B. Incident numbering is manual rather than automated
- C. No mentioning of reproduceability
- D. No classification on type of incident

Correct Answer: A

QUESTION 5

Since the system is in the medical domain and therefore in the safety critical area, testing needs to be rigorous and evidence is required that the system has been adequately tested. Identify THREE measures that would typically be part of the test approach in this domain and which are not always applicable in other domains!

- A. High level of documentation
- B. Failure Mode and Effect Analysis (FMEA) sessions
- C. Traceability to requirements
- D. Non-functional testing
- E. Master test planning
- F. Test design techniques
- G. Reviews

Correct Answer: ABC

QUESTION 6

The test improvement project will take place in an organization developing a safety- critical avionics application.

Which one of the following standards do you believe would be most appropriate to take into account for compliance during your assignment?

- A. ISO 9126

- B. IEEE 829
- C. BS 7925/2
- D. DO-178B

Correct Answer: D

QUESTION 7

IEEE 1028 also defines "management review" as a type of review.

What is the main purpose of a management review?

- A. Align technical concepts during the design phase
- B. Establish a common understanding of requirements
- C. Provide independent evaluation of compliance to processes, regulations, standards etc.
- D. To monitor progress, assess the status of a project, and make decisions about future actions

Correct Answer: D

QUESTION 8

Considerable attention will be given in this project to defining exit criteria and on reporting back on their status. Which combination of TWO exit criteria from the list would be best to use?

- I. Total number of defects found
- II. Percentage of test cases executed
- III. Total test effort planned versus total actual test effort spent
- IV.

Defect trend (number of defects found per test run over time)

- A.
(i) and (ii)
- B.
(i) and (iv)
- C.

(ii) and (iii)

D.

(ii) and (iv)

Correct Answer: D

QUESTION 9

Which of the following product risks would be most effectively addressed just by static testing?

- A. In the delivered application, one of the countries, as specified in the requirements, has not been correctly implemented.
- B. The application takes too long to process a request for additional cover.
- C. The test cases do not cover the key requirements.
- D. The successful bidder may not deliver all the required functionality on time.

Correct Answer: C

QUESTION 10

Which of the following is NOT a typical key challenge for testing in a RAD based development approach?

- A. Re-usable test scripts for (automated) regression testing
- B. Project management and control
- C. No complete requirements specification
- D. Time-boxing

Correct Answer: B

QUESTION 11

Given the following figures for the testing on a project, and assuming the failure rate for initial tests remains constant and that all retests pass, what number of tests remain to be run?

Test planned	1000
Initial tests run	500
Initial tests passed	350
Retests run	80

- A. 700
- B. 720
- C. 784
- D. 570

Correct Answer: B

QUESTION 12

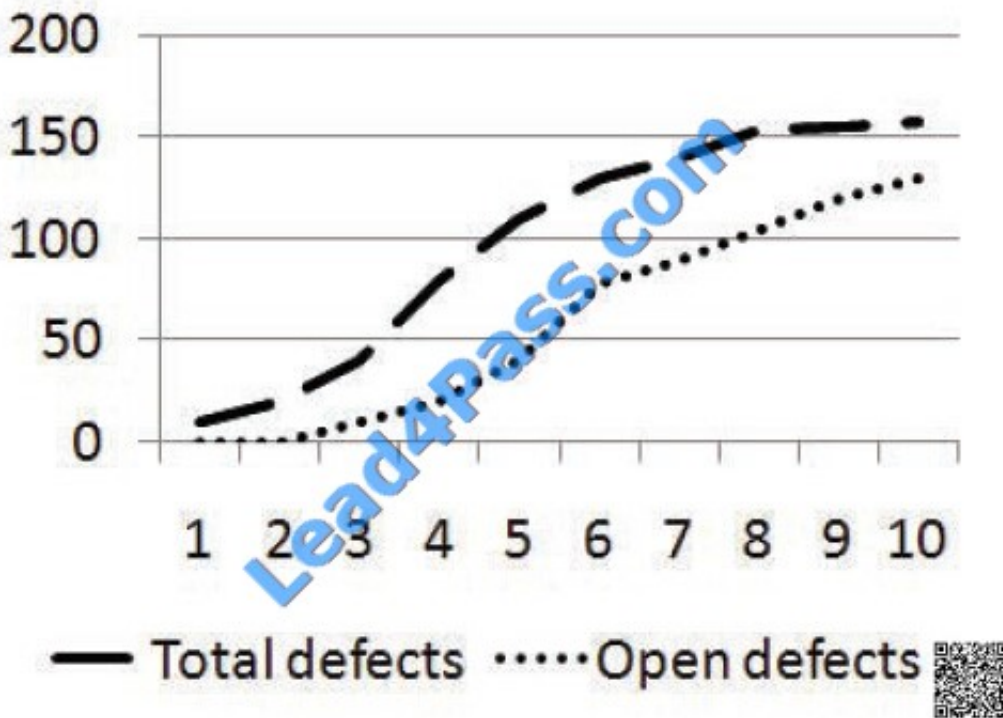

Comparing TMMi and TPI, which is not a valid reason for choosing either TPI or TMMi?

- A. If the scope of test performance improvement covers all test levels, TMMi is preferred since TPI focusses mainly on black-box testing.
- B. If the organization is already applying CMMI, TMMi may be preferred since it has the same structure and uses the same terminology. TMMi addresses management commitment very strongly and is therefore more suitable to support a top-down improvement process.
- C. TPI is much more a bottom-up model that is suitable for addressing test topics for a specific (test) project.
- D. TMMi can only be used with the traditional V model, whereas TPI can be used with all types of software life cycles.

Correct Answer: D

QUESTION 13

Given is the following defect removal chart reported at the end of system testing - showing total defects detected and closed defects (fixed and successfully retested). A number of open defects are classified as critical. All tests have been executed.

Based on the chart above, what is the most appropriate next test phase?

- A. Acceptance testing to verify the business process
- B. Acceptance testing to verify operational requirements
- C. Requirements testing as part of testing regulatory compliance
- D. Another system test cycle to verify defect resolution

Correct Answer: D

QUESTION 14

Within the projects, a master test plan and phase test plan will be used. Following is a list of characteristics applicable for test plans:

Which THREE mentioned characteristics relate to the master test plan?

- A. Any deviation from the procedures described in the test strategy document
- B. The overall estimated costs, timescales and resource requirements
- C. A detailed schedule of testing activities
- D. The development deliverables to be tested
- E. Which test staff members (names) will be involved and when

F. Level of requirements coverage achieved

Correct Answer: ABD

QUESTION 15

Continuing with the Scenario described in the previous question, which of the following topics would you need to address in detail in the master test plan?

- A. An approach to regression testing
- B. A list of boundary values for "advance amount"
- C. A description of dependencies between test cases
- D. A logical collection of test cases

Correct Answer: A
