QUESTION 1

How do you configure the rate of file submissions to WildFire in the NGFW?

A. based on the purchased license uploaded

B. QoS tagging

C. maximum number of files per minute

D. maximum number of files per day

Correct Answer: C

https://www.paloaltonetworks.com/documentation/80/wildfire/wf_admin/submit-files-for-wildfire-analysis/firewall-file-forwarding-capacity-by-model

QUESTION 2

Access to a business site is blocked by URL Filtering inline machine learning (ML) and considered as a false-positive.

How should the site be made available?

A. Disable URL Filtering inline ML

B. Create a custom URL category and add it to the Security policy

C. Create a custom URL category and add it on exception of the inline ML profile

D. Change the action of real-time detection category on URL filtering profile

Correct Answer: C

QUESTION 3

An administrator wants to justify the expense of a second Panorama appliance for HA of the management layer.

The customer already has multiple M-100s set up as a log collector group. What are two valid reasons for deploying Panorama in High Availability? (Choose two.)

A. Control of post rules

B. Control local firewall rules

C. Ensure management continuity

D. Improve log collection redundancy

Correct Answer: CD

QUESTION 4

Which task would be identified in Best Practice Assessment tool?

A. identify the visibility and presence of command-and-control sessions

B. identify sanctioned and unsanctioned SaaS applications

C. identify the threats associated with each application

D. identify and provide recommendations for device management access

Correct Answer: B

QUESTION 5

In which two ways can PAN-OS software consume MineMeld outputs? (Choose two.)

A. TXT

B. API

C. CSV

D. EDL

Correct Answer: AD

QUESTION 6

A customer requires protections and verdicts for portable executable (PE) and executable and linkable format (ELF), as well as the ability to integrate with existing security tools.

Which Cloud-Delivered Security Service (CDSS) does Palo Alto Networks provide that will address this requirement?

A. Dynamic Unpacking

B. WildFire

C. DNS Security

D. File Blocking profile

Correct Answer: B

QUESTION 7

What is the basis for purchasing Cortex XDR licensing?

A. volume of logs being processed based on Datalake purchased

B. number of nodes and endpoints providing logs

C. unlimited licenses

D. number of NGFWs

Correct Answer: B

https://docs.paloaltonetworks.com/cortex/cortex-xdr/cortex-xdr-pro-admin/cortex-xdr-overview/cortex-xdr-licenses/migrate-your-cortex-xdr-license

QUESTION 8

Which Security profile on the Next-Generation Firewall (NGFW) includes Signatures to protect against brute force attacks?

A. Vulnerability Protection profile

B. Antivirus profile

C. URL Filtering profile

D. Anti-Spyware profile

Correct Answer: A

QUESTION 9

What two types of certificates are used to configure SSL Forward Proxy? (hoose two.)

A. Enterprise CA-signed certificates

B. Self-Signed certificates

C. Intermediate certificates

D. Private key certificates

Correct Answer: AB

Reference: https://docs.paloaltonetworks.com/pan-os/9-1/pan-os-admin/decryption/configure-ssl-forward-proxy#:~:text=You%20can%20use%20an%20enterprise,as%20the%20forward%20trust%20certificate.andtext=Certificate%20Name,.,unique%20name%20for%20each%20firewall

QUESTION 10

When the Cortex Data Lake is sized for Traps Management Service, which two factors should be considered? (Choose

two.)

A. retention requirements

B. Traps agent forensic data

C. the number of Traps agents

D. agent size and OS

Correct Answer: BD

QUESTION 11

Which three mechanisms are valid for enabling user mapping? (Choose three.)

A. Captive Portal

B. Domain server monitoring

C. Reverse DNS lookup

D. User behaviour recognition

E. Client probing

Correct Answer: ABE

QUESTION 12

A customer with a legacy firewall architecture is focused on port and protocol level security, and has heard that next generation firewalls open all ports by default. What is the appropriate rebuttal that positions the value of a NGFW over a legacy firewall?

A. Palo Alto Networks keep ports closed by default, only opening ports after understanding the application request, and then opening only the application-specified ports.

B. Palo Alto Networks does not consider port information, instead relying on App-ID signatures that do not reference ports.

C. Default policies block all interzone traffic. Palo Alto Networks empowers you to control applications by default ports or a configurable list of approved ports on a per-policy basis.

D. Palo Alto Networks NGFW protects all applications on all ports while leaving all ports opened by default.

Correct Answer: B

QUESTION 13

What are the three possible verdicts in WildFire Submissions log entries for a submitted sample? (Choose four.)

A. Benign

B. Spyware

C. Malicious

D. Phishing

E. Grayware

Correct Answer: ACDE

Reference: https://docs.paloaltonetworks.com/wildfire/9-1/wildfire-admin/monitor-wildfire-activity/use-the-firewall-to-monitor-malware/monitor-wildfire-submissions-and-analysis-reports.html

QUESTION 14

Which CLI allows you to view the names of SD-WAN policy rules that send traffic to the specified virtual SD-WAN interface, along with the performance metrics?

A)

```
>show sdwan rule interface <sdwan.x>
```

B)

```
>show sdwan connection all | <sdwan-interface>
```

C)

```
>show sdwan path-monitor stats vif <sdwan.x>
```

D)

```
=>show sdwan session distribution policy-name <sdwan-policy-name>
```

A. Option A

B. Option B

C. Option C

D. Option D

Correct Answer: A

https://docs.paloaltonetworks.com/sd-wan/1-0/sd-wan-admin/troubleshooting/use-cli-commands-for-sd-wan-tasks.html
